

HTEC Internship Program

Join us on Friday May 30 at conference room 1101 at 10AM to learn more about HTEC, our projects and internship & scholarship program.

Who are we?

HTEC is a leader in technological innovations, known for creating advanced solutions for global clients. Our talented team of experts spans the globe, offering a dynamic and stimulating work environment that encourages innovation and professional growth.

HTEC has welcomed interns many times before, but this is our first-ever embedded systems paid internship. We'd love for you to be part of this exciting new venture if you're passionate about technology and eager to dive into embedded systems.

What do we offer?

- A paid full-time internship or scholarship.
- Hybrid work environment and in person meetings with your dedicated mentor one or more times a week in our comfy office space.
- Opportunity for permanent employment upon successful completion.
- We're offering opportunities to work on cutting-edge projects in the fields of embedded AI, machine learning (ML) compilers, and automotive ADAS (Advanced Driver Assistance Systems). Interns will gain hands-on experience with the latest technologies enabling the deployment of large language models (LLMs) such as GPT on dedicated AI hardware. This is a unique chance to explore the intersection of AI, edge computing, and automotive innovation, contributing to real-world applications that push the boundaries of performance and efficiency in intelligent systems.

Who are you?

- *You're in your final year of studies or a recent graduate in electrical engineering, computer engineering, or computer science AND you have a solid grasp of C and C++ (Hands-on experience is always a plus).*
- *You're comfortable using English daily.*
- *You're motivated to dive into embedded systems, ready to tackle real challenges, and eager to work on projects that push the boundaries of technology, this opportunity is for you.*

We can't wait to meet you
